-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election of Specie I.(claims 1,2,5-10,13-17,22,23,26-32 and 35) in the reply filed on 7/25/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Accordingly, claims 3,4,11,12,18-21,24,25,33 and 34 are withdrawn from further consideration by Examiner.

Specification

The attempt to incorporate subject matter into this application by reference to US Applications 09/436,858, 09/586,054 and 09/970,383 on pages 9 and 10 is ineffective because the reference thereto failed to include associated filing dates of the Applications.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,5-10,13-17,22,23,26-32 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sullivan et al. (US Pat. 6,398,739) in view of Friedlander (US Pat. 5,313,945).

The Sullivan et al. reference discloses a patient treatment device (i.e. CPAP system) with associated blower and snore sensor 11 (i.e. microphone), but does not disclose a means for minimizing acoustic noise, as claimed. The Friedlander reference discloses another patient treatment system with a means for minimizing acoustic noise (see Cancellation Control Unit in Fig. 3) arranged to cancel or minimize undesired noises associated with the patient treatment device to thereby result in a more quiet/comforting patient treatment experience. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Sullivan et al. device to have a means for minimizing acoustic noise in view of the teachings of the Friedlander reference to cancel or minimize undesired noises associated with the patient treatment device to thereby result in a more quiet/comforting patient treatment experience.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Pessala et al., Cewers and Kushner et al. reference pertain to respiratory systems with associated sound sensors/analyzers.
